A full career, business and wealth deep-dive: ranked domains and role ladders, working mode, income style, carrying capacity, investment behaviour, and a decade-by-decade transition timeline. Read the rankings as fits and tendencies, not destiny.

Career Archetypes — Ranked Domains

Your career archetypes are the fields the chart can carry, ranked by what it needs (Favorable Element / Supporting Element) rather than by the Day Master's own element — the classical priority in §Favorable Element vs. Day Master for Career Choice is to "align work with what the chart needs", because work that reinforces an already-dominant element pushes the chart further out of balance. Best Fit = directly aligned; Good Fit = supportive breadth; Possible = workable but not strongly resourced by the chart.

Domain Deep-Dive — Why Each Archetype Fits

Each ranked archetype below is read for this chart: what the element family is, why the chart fits it, the practical way to use it, and the honest caveat where the fit is weaker.

Leadership & Executive Roles (Best Fit)

- Element family: Fire — this family is public-facing and expressive — it makes things seen and energises an audience (Fire maximum outward radiance that cannot act in private,).
- Why it fits your chart: This is a Best Fit: the family runs on Fire, your favorable element, so the work moves with the chart's grain instead of against it.
- How to use it: Lean into it deliberately — this is where effort compounds fastest and friction is lowest.
- Caveat: Even a favorable element can be overrun if pursued to excess; keep other tracks alive so the chart stays balanced.
- Roles: team lead, director, general manager, founder-CEO

Entrepreneurship (Good Fit)

- Element family: Fire — this family is public-facing and expressive — it makes things seen and energises an audience (Fire maximum outward radiance that cannot act in private,).
- Why it fits your chart: A Good Fit: the family runs on Fire, your favorable element, so the work moves with the chart's grain instead of against it. It is well resourced by the chart, just not at the very top of the ranking.
- How to use it: Treat it as a lead second track, or a strong complement to your Best-Fit work.
- Caveat: Strong but not primary — pick it deliberately rather than by default, and keep the favorable element in play alongside it.

Real Estate & Property (Possible)

- Element family: Earth — this family holds, stores and mediates — it stabilises assets and provides the base others rely on (Earth the element that contains and stands between,).
- Why it fits your chart: A Possible fit: the family runs on Earth, your Supporting Element, which strengthens the chart's balance rather than draining or feeding the Day Master.
- How to use it: Use it only inside a supporting structure, with the favorable element present to offset it; do not make it the core identity of the work.

Ten-God → Career Mode

Your dominant ten-god class is Companion (compare rob) — Peer/team or independent operator — working alongside or against equals on one's own terms..

Employment vs. Entrepreneurship

A hybrid reading: the chart supports either a structured role with side output, or an independent practice with an anchor client/employer. Keep a stable base while the independent side is proven.

Company / entity fit: visible, fast, audience-facing organisations — founder-led or brand-led teams where recognition compounds.

Archetype Deep-Dive

Wealth Pattern

Wealth timing is read from where Wealth ten-gods appear and are supported. Your favorable element Fire and supporting element Earth describe the broader climate that helps those wealth channels function; they are not the wealth channel itself. Wealth ten-gods are visible in the natal pillars, so earning capacity is rooted in the chart. Use the Major Luck and Annual Luck tables to see when income and value-creation themes surface most clearly. Periods dominated by Wood call for conservation rather than expansion.

Income Rhythm

Income tends to arrive in steady increments — a salaried baseline, retainer work, or recurring contracts. The Direct Wealth stem is visible but not echoed in a branch, so the source is real but may need more conscious maintenance to stay durable.

Skill-Levers to Develop

Companion-dominant charts tend to grow fastest through peer collaboration, team facilitation, and honest self-assessment. Cultivate public visibility — speaking, publishing, or teaching — to light Fire's radiance.

Company-Type Fit

A boutique firm or solo practice is the most likely fit. The Seven Killings presence without Direct Officer prefers competitive, high-velocity environments over bureaucratic ones, and the strong Day Master can absorb the volatility.

Boss / Team Dynamics

The ideal manager profile is a warm Fire motivator — someone who carries your favorable Fire element, supplying what the chart needs rather than competing with your Day Master. Watch for constant crisis mode that fragments Wood's growth; this is the most common way the querent's energy gets drained in a team setting.

Red-Flag Environments

Look out for: slow bureaucratic processes that the querent's energy quickly overruns; unclear decision rights — strong Day Masters struggle without ownership; teams that refuse to challenge the querent's ideas.

Income Style & Carrying Capacity

Income style: Mixed Wealth (Wealth) — income comes from a base plus variable upside; stabilising if the Day Master can carry it, scattering if not.

Carrying capacity: Strong Day Master — you can carry Wealth and Authority directly; wealth that comes in can be held. The caution is not to hold beyond what the chart supports — diversify so no single loss is structural.

Partnership & shared-money risk: Your chart carries 5 Companion stems — the peer-drains-wealth pattern reads shared and loosely-defined money as contested. Put ownership percentages in writing, keep separate accounts, and prefer sole operation or hard-boundary partnerships.

Investment Behaviour

Plan and negotiate in periods running Fire / Earth; treat years dominated by Wood as conservation, review and patience rather than expansion. Large, long-term commitments (property, deeds, contracts) key to Resource in the classics — prefer placing them where Resource is active and the year runs the favorable element, not in a bare Wealth year. Storehouse (wealth storehouse) charts accumulate quietly and release in bursts: be ready for the release windows rather than expecting steady flow. This describes stewardship tendencies, not investment instructions.

Wealth Preservation

Favour custodianship aligned with your favorable element and diversify enough that no single loss is structural; in Companion/Unfavorable Element periods, defend rather than expand.

Career Transition Timing — Decade by Decade

Each 10-year major-luck period (Major Luck) is read from its own ten-god theme plus the favorable balance of the annual pillars inside it.
