A full career, business and wealth deep-dive: ranked domains and role ladders, working mode, income style, carrying capacity, investment behaviour, and a decade-by-decade transition timeline. Read the rankings as fits and tendencies, not destiny.

Suitable Career Domains — Ranked

Domains are ranked by the chart's need (Favorable Element / Supporting Element), not by the Day Master's own element — the classical priority in §Favorable Element vs. Day Master for Career Choice is to "align work with what the chart needs", because work that reinforces an already-dominant element pushes the chart further out of balance.

Ten-God → Career Mode

Your dominant ten-god class is Companion (compare rob) — Peer/team or independent operator — working alongside or against equals on one's own terms..

Employment vs. Entrepreneurship

Resource is active and the year runs the favorable element, not in a bare Wealth year. Storehouse (wealth storehouse) charts accumulate quietly and release in bursts: be ready for the release windows rather than expecting steady flow. This describes stewardship tendencies, not investment instructions.

Wealth Preservation

Favour custodianship aligned with your favorable element and diversify enough that no single loss is structural; in Companion/Unfavorable Element periods, defend rather than expand.

Career Transition Timing — Decade by Decade

Each 10-year major-luck period (Major Luck) is read from its own ten-god theme plus the favorable balance of the annual pillars inside it.
