Career Archetypes — Ranked Domains

Your career archetypes are the fields the chart can carry, ranked by what it *needs* (Favorable Element / Supporting Element) rather than by the Day Master's own element — the classical priority in §Favorable Element (용신) vs. Day Master for Career Choice is to "align work with what the chart needs", because work that reinforces an already-dominant element pushes the chart further out of balance. **Best Fit** = directly aligned; **Good Fit** = supportive breadth; **Possible** = workable but not strongly resourced by the chart.

Domain Deep-Dive — Why Each Archetype Fits

Each ranked archetype below is read for *this* chart: what the element family is, why the chart fits it, the practical way to use it, and the honest caveat where the fit is weaker.

Leadership & Executive Roles (**Best Fit**)

- **Element family:** Fire — this family is public-facing and expressive — it makes things seen and energises an audience (*Fire maximum outward radiance that cannot act in private*).

- **How to use it:** Lean into it deliberately — Leadership & Executive Roles is where effort compounds fastest and friction is lowest.
- **Caveat:** Even a favorable element can be overrun if pursued to excess; keep other tracks alive alongside team lead, director, general manager, founder-CEO so the chart stays balanced.

Ten-God → Career Mode

Your dominant ten-god class is **compare rob (比劫)** — Peer/team or independent operator — working alongside or against equals on one's own terms..

Employment vs. Entrepreneurship

A **hybrid** reading: the chart supports either a structured role with side output, or an independent practice with an anchor client/employer. Keep a stable base while the independent side is proven.

Company / entity fit: visible, fast, audience-facing organisations — founder-led or brand-led teams where recognition compounds.

Archetype Deep-Dive

Wealth Pattern

Wealth timing is read from where Wealth ten-gods appear and are supported. Your favorable element **Fire** and supporting element **Earth** describe the broader climate that helps those wealth channels function; they are not the wealth channel itself. Wealth ten-gods are visible in the natal pillars, so earning capacity is rooted in the chart. Use the Major Luck (대운) and Annual Luck (세운) tables to see when income and value-creation themes surface most clearly. Periods dominated by **Wood** call for conservation rather than expansion.

Income Rhythm

Income tends to arrive in **steady increments** — a salaried baseline, retainer work, or recurring contracts. The Direct Wealth stem is visible but not echoed in a branch, so the source is real but may need more conscious maintenance to stay durable.

Skill-Levers to Develop

Companion-dominant charts tend to grow fastest through peer collaboration, team facilitation, and honest self-assessment. Cultivate **public visibility** — speaking, publishing, or teaching — to light Fire's radiance.

Company-Type Fit

A **boutique firm or solo practice** is the most likely fit. The Seven Killings presence without Direct Officer prefers competitive, high-velocity environments over bureaucratic ones, and the strong Day Master can absorb the volatility.

Boss / Team Dynamics

The ideal manager profile is a **warm Fire motivator** — someone who carries your favorable **Fire** element, supplying what the chart needs rather than competing with your Day Master. Watch for constant crisis mode that fragments Wood's growth; this is the most common way your energy gets drained in a team setting.

Red-Flag Environments

Look out for: slow bureaucratic processes that your energy quickly overruns; unclear decision rights — strong Day Masters struggle without ownership; teams that refuse to challenge your ideas.

Income Style & Carrying Capacity

Income style: Mixed Wealth (재성) (Mixed Wealth) — income comes from a base plus variable upside; stabilising if the Day Master can carry it, scattering if not.

Carrying capacity: Strong Day Master — you can carry Wealth (재성) and Authority (관성) directly; wealth that comes in can be held. The caution is not to hold *beyond* what the chart supports — diversify so no single loss is structural.

Partnership & shared-money risk: Your chart carries **5 Companion** stems — the peer-drains-wealth (겁재奪財) pattern reads shared and loosely-defined money as contested. Put ownership percentages in writing, keep separate accounts, and prefer sole operation or hard-boundary partnerships.

Investment Behaviour

Plan and negotiate in periods running **Fire** / **Earth**; treat years dominated by **Wood** as conservation, review and patience rather than expansion. Large, long-term commitments (property, deeds, contracts) key to **Resource** in the classics — prefer placing them where Resource (인성) is active *and* the year runs the favorable element, not in a bare Wealth (재성) year. Storehouse (재고) charts accumulate quietly and release in bursts: be ready for the release windows rather than expecting steady flow. This describes stewardship *tendencies*, not investment instructions.

Wealth Preservation

Favour custodianship aligned with your favorable element and diversify enough that no single loss is structural; in Companion (비겁)/Unfavorable Element (기신) periods, **defend rather than expand**.
